

WebIQ

Product Overview

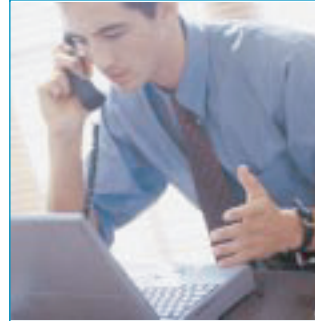

WebIQ is a browser-based software tool that gathers and organizes your team to find faster, better solutions.

WebIQ, LLC is an Internet software development company serving the business market worldwide with web-based tools to channel the power of your team into solutions with faster, more effective decision-making.

The successful enterprise helps its employees make important decisions in the least amount of time. Accomplishing this requires teamwork, consensus building and information sharing in a fast-paced distributed environment.

WebIQ provides all the convenience and flexibility you'd expect from an Internet application - and so much more. Only WebIQ gives team members the option to participate in group sessions as their schedules permit. Plus, WebIQ goes beyond online discussions and application sharing to provide a framework to evaluate any business issue.

WebIQ's superior organizational and evaluation features store all of your team's comments and ideas in one easy-to-follow discussion. It provides a structure to evaluate alternatives and identify solutions. You can attach your important documents, run the numbers, and develop the policy statement all in one session. It's accessible anytime, anywhere, with an Internet connection. It even creates an action plan to keep your team focused. WebIQ's flexible agenda and unique interactive format will help you get the answers you need right now.

A Complete Solution

To participate, team members use any Internet connection to instantly access the session anywhere, anytime. Simultaneously or at their convenience, in the timeless, virtual world. No meetings to coordinate or scheduling conflicts to distract you. Participate when it fits your schedule and review the session later, with WebIQ's complete online records.

WebIQ's initial set-up is fast and user training is available online.

Whenever your group has an issue to resolve, use WebIQ to set up an online session for the team. Create an agenda from the

WebIQ Tool Kit to guide the group discussion

through brainstorming, analysis, evaluation and action plan.

These tools help you create an organized agenda that propels your team beyond "threaded discussions" to actual results.

**WebIQ
translates
discussions into
decisions – and
decisions into
actions**
